CAPABILITIES & SERVICES

Accelerating Artificial Intelligence & Robotic Process Automation – GAI's AI & RPA practice provides agencies with education, technology enablement, contract vehicles and expertise, along with professional services and support.

Big Data Analytics – GAI's big data analytics solutions provides agencies with the analytics and detection software necessary to utilize big data to its fullest.

Cloud Computing – Working side-by-side with Federal Agencies and partners including Cisco, Dell, and Microsoft, GAI provides cloud solutions to help agencies evaluate current cloud models and navigate the many cloud options.

Cyber Security & Information Assurance – GAI's cyber security capabilities provide agencies with the cyber threat prevention solutions they need to stay safe. Our mature Supply Chain Security processes, monitoring, and reporting enables customer compliance.

Data Center Modernization – GAI's data center management capabilities provide an Information Technology Infrastructure Library (ITIL)-based approach to centrally managing data center information assets.

Mobile & End User Computing – GAI's mobility and end user computing solutions ease the delivery and management of devices and applications while improving security and end user experiences.

Professional Services – GAI provides qualified personnel with expertise in training, project management, and solution development. We rely on the breadth of our knowledge to help define the optimal solution for a customer need and the experience of our team to follow through with post-award execution. GAI can provide appropriately cleared resources on-site in various geographic regions or anywhere virtually.
